Secure .gov websites use HTTPS A lock () or https:// means you've safely connected to the .gov website. Share sensitive information only on official, secure websites. Diabetes Testing May 15, 2024 Español Key points You'll need a blood sugar test to find out if you have prediabetes or diabetes. Testing is simple, and results are usually available quickly. Why get tested Prediabetes and type 2 diabetes often don't have any symptoms . (Type 1 diabetes is different—symptoms can develop quickly and can be severe.) That's why people with any risk factors are urged to ask their doctor if they should be screened. Being screened means getting tested when you don't have any symptoms. Catching prediabetes early can help people prevent or delay type 2 diabetes. Finding out they have type 2 diabetes—and taking action—can help people prevent or delay serious health complications. Getting tested is simple and quick. Your blood will be drawn at your doctor's office or at a clinic so your blood sugar can be tested. Results are usually available quickly. Keep Reading Diabetes Risk Factors When to get tested Prediabetes and type 2 diabetes Ask your doctor about getting tested for prediabetes or type 2 diabetes if you have any of the risk factors . If you had your blood sugar tested at a h
