Individualised care

1.1 Tailoring care to a person's needs

1.1.1

Adopt an individualised approach to diabetes care that is tailored to the needs and circumstances of adults with type 2 diabetes, taking into account their personal preferences, comorbidities and risks from polypharmacy, and their likelihood of benefiting from long-term interventions. Such an approach is especially important in the context of multimorbidity. See also

NICE's guidelines on assessing and managing multimorbidity

and on

medicines optimisation

[2015, amended 2026]

1.1.2

Reassess the person's needs and circumstances at each review and think about whether to stop any medicines that are not effective.

[2015]

1.1.3

Take into account any disabilities, including visual impairment, when planning and delivering care for adults with type 2 diabetes. It is particularly important to choose the technology that best supports a person's diabetes care.

[2015, amended 2026]

1.1.4

For discussions about overweight and obesity, see

NICE's guideline on overweight and obesity management

. In particular, see:

section on general principles of care

section on classifying overweight and obesity in adults

recommendation 1.11.3 on addressing the drivers of overweight and obesity

[2026]

1.1.5

For further guidance on collaborative care, blood glucose management and insulin use for people with diabetes and an eating disorder, see the
